What is Reach?

Reach, is a **sports management** tool that makes organized university sports easy. Athletes can **navigate, find**, and successfully **join** their university's sports team in just a couple clicks.

Additionally, **universities teams** and **organizations** can easily communicate, manage teams, and bill athletes and staff through our A.I driven automation management system. All this power, can be controlled by athletes and universities simply through our web, IOS, or Android application.
